

ATR Klipper Anti-panic Tripod Turnstile

Waist high tripod turnstile gate with **automatic folding arms**

High-performance bi-directional waist high turnstile designed for heavy duty applications and intensive pedestrian movement areas.

Durable weatherproof construction reinforces unauthorized entry protection and provides added value where vandalism is a risk.

ANTI-PANIC FOLDING ARMS

In case of power failure the top arm will drop down automatically. Alternatively this function can be triggered by a signal from fire alarm system or manually by staff, allowing for a fast evacuation of guests and personnel in emergency situations. When power supply is restored or the emergency signal suspended, arms will return to standard operating position.

SEAMLESS INTEGRATION

ATR Klipper is ready for a seamless integration with access control, ticketing and fire alarm systems and offers numerous possibilities for surface or concealed installation of readers and other devices.

100% TESTED

Each gate passes a complete inspection of all functions prior to shipment. Customers receive only flawless and checked products.

Folding arms drop down in case of emergency, immediately clearing the passage and providing a free escape route.

Available with powder coated steel frame or stainless steel frame. Powder coating available in any RAL colour.
