

The ideal solution for unattended payment of fees (e.g. for parking, admission, administrative or regulatory fees, etc.) The payment kiosk prints receipts and refunds overpayments from

large-capacity coin dispensers. Refunding banknotes or accepting card payments are available options. The kiosk can be delivered in any colour.

24/7 Availability

Large Cash Storage

Robust Stainless Steel Housing

Unattended Payments 24/7

The payment kiosk is available 24 hours a day, 7 days a week which makes it an ideal solution for collecting fees outside normal working hours or in places without staff.

Multiple Fee Types

Besides payments for parking, the automatic pay station can collect up to three additional flat rate fees.

Payments in Various Currencies

Payments can be made in both main and supplementary currencies. A typical case is the main currency being the local currency and the supplementary currency being EUR. Refunds are always paid out in the main currency according to a preset exchange rate.

Large Cash Storage

Large cash storage reduces the necessity to withdraw or refill cash as often as with other payment kiosks. EPA kiosk can be equipped with the option to refund banknotes, which further extends the period between the need to refill or withdraw cash.

Debit/Credit Card Payments

Provision for contact and contactless card payments is available upon request. (May not be currently available for all countries)

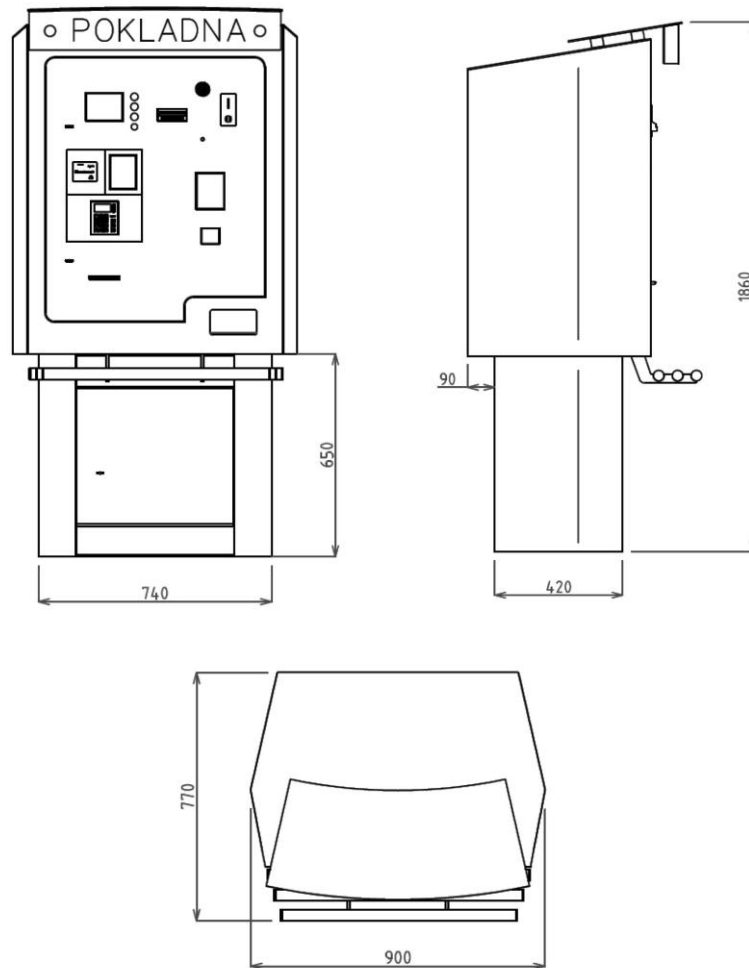

Automatic Notifications

The kiosk sends automatic notifications (low paper, empty/full cash storage, etc.). Requires LAN/Internet connection.

Technical Parameters
